

dicas 2015

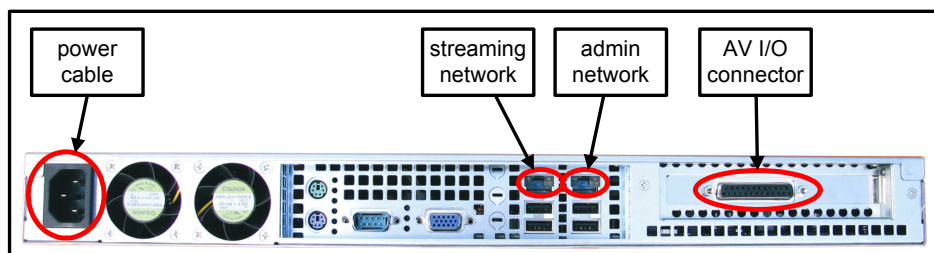

Quickstart Guide

Version: 1.2.0
Date: 23 April 2007
Responsible: F. Pachaly (pachaly@dicas.de)

Setup & Installation Overview

- Plug in the power, audio/video connection and network cables.

Note that you need to plug in both network devices prior to startup.

- Configure the dicas 2015 through the web driven interface (to change the administration interface's IP address you can alternatively utilise the front display). You can access this interface by guiding your web browser to the following URL:

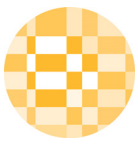

<http://192.168.0.99/admin/index.php>

User: *admin* / Password: *admin*

Initially please configure the following network options in the setup section:

- **IP Address Admin IF:** Set the IP address in the administration network.
- **IP Address Streaming IF:** Set the IP address on the streaming network.
- **Gateway (optional):** Specify the gateway of the network.
- **DNS (optional):** Specify the DNS server of the network.

On pressing 'Apply Changes' the configuration is stored and applied.

dicas 2015

Quickstart Guide

Streaming configuration

To configure the dicas 2015 please connect to the admin tool by opening the following URL in a browser. Please replace the <dicas 2015 admin IP> address:

http://<dicas2015_admin_IP>/admin/index.php

Input parameters

The input options must be set according to the coded video source device:

- **URL:** Please choose the location of the source SDP file or the TS URL.

On pressing 'Apply Changes' the configuration is stored and applied.

Output parameters

Please choose the appropriate output.

- **Video/Audio Connector Type:** Please select the output connector type: 'component/analog' or 'composite/analog' or 'SDI/SDI-embedded'
- **Output Video Format:** Toggle Format between PAL and NTSC.

On pressing 'Apply Changes' the configuration is stored and applied.

Start/Stop

When the 'Start Streaming' button is pressed, the status bar will indicate this by changing from a red to a green symbol and providing information about the current settings.

Pressing the 'Stop Streaming' button, stops the encoding/streaming process.

More information

Please take a look at the User Manual for detailed information.
